

Tomáš Hink

Chief Financial Officer with a background in information technology

I am the Chief Financial Officer of CZECH STYLE, a family company based in Zlín that has been active since 1999 in tyres (the Pneumatiky365 online shop, retreading and tyre service) and stainless-steel piping systems (TAVINOX). I also manage HINKIF, my family's private asset structure. Since 2014 I have designed and run IT and network infrastructure for businesses; at Brno University of Technology I taught laboratory sessions and, as a doctoral researcher, studied information systems in companies.
